Tally.Server 9

POWER OF SIMPLICITY

Tally.Server9 - An enterprise class product

Tally.server 9 is an enterprise-class product that will provide Tally.ERP 9 Gold users the necessary power and control for their growing business needs. Tally.server 9 converts the existing peer-to-peer kind of data access to server-based data management.

Tally.server 9 is a powerful data server that will redefine the efficiency of medium and large businesses that have multiple users performing various activities simultaneously. It is an extremely simple-to-deploy product that provides concurrent, fast and secure access to Tally data as well as advanced monitoring and administrative control. As a result of this, businesses will directly experience an increase in productivity, better utilization of man-hours, enhanced speed of operations, and hence superior business performance.

Key Operational Benefits

1. **Speed with Concurrent Data Access:** All users will be able to work faster without impacting each other's access to the data, thereby increasing organizational efficiency. One users' activity will not block the other users' activity.
2. **Security and Control:** The administrator/business owner will be able to control the visibility of physical data files and the rights for administrative operations of all users thereby minimising risks like data misuse
3. **Monitoring and Optimization:** The administrator/business owner will be able to monitor which user(s) are currently logged in, track their activities and even disconnect them if required. They will be able to view real-time information on usage of the system, patterns of user activities and areas where more time is spent and thereby optimize productivity
4. **Zero Downtime:** The users will not experience downtime even for maintenance operations like backup. The system ensures data consistency even in intense use environments and has zero impact of any abnormal client shutdown.

Words are not enough to express, best way to know is to experience... so just start
